INC., a Delaware Corporation; and DOES) Judge: Hon. Barry T. Moskowitz
1 – 100,)
) <i>Oral argument is respectfully requested</i>
Defendants.) <i>by Plaintiff</i>
)

SUMMARY OF REPLY

Defendant has failed to demonstrate any sound reason why the Court should not allow Plaintiff to take steps to ensure preservation of physical evidence of the accused manufacturing process, evidence is currently held by unidentified third parties. Those third parties have no incentive to preserve evidence, nor does the Defendant.

Reexamination of a patent does not make it “suspect,” nor does it minimize the need to preserve evidence. Plaintiff’s requests are narrow, concise and unambiguous. Emerson has not provided Plaintiff with actual manufacturing information, nor with the ability to obtain it on his own. Preservation of this necessary evidence can only be assured through allowing the requested, narrow exception to stay, or conducting a 35 U.S.C. § 295 hearing to switch the burden of proof to the party having superior access to the evidence.

ARGUMENT

This Court’s order of stay stated that “Any party may apply to the court for an exception to the stay if it has specific, valid reasons to believe that it needs to obtain discovery in order to preserve evidence that will otherwise be unavailable after the stay.” *Order Granting Defendants’ Motion for Stay Pend. Reexam*, Docket 21, 2:5-7.

Because the stay order issued prior to any discovery being permitted in the case, Plaintiff reasonably construed the above language to take into account the inability of Plaintiff to provide more specificity to requests for exceptions to stay than would be available with the benefit of formal discovery. Any greater requirement for specificity would render this portion of the Court’s order without effect.

///

///

1 **I. ACCEPTANCE OF A PATENT FOR REEXAMINATION DOES NOT**
2 **MAKE IT “SUSPECT.”**

3 Defendant’s blithe assertion that Plaintiff’s patent is “**suspect**” must be
4 addressed because it taints the entire Opposition. The Plaintiff holds a valid and
5 enforceable patent and it should be treated as such before this Court.

6 U.S. Patent No. 4,935,184 was issued by the United States Patent and
7 Trademark Office (“USPTO”) on June 19, 1990 after 28 months of running the
8 gauntlet of the vetting process set forth by U.S. patent laws. No requests for
9 reexamination of the patent were made with the USPTO for almost 20 years while
10 the patent holder was issuing licenses for the patent. Only when Plaintiff filed a
11 \$1.44 billion lawsuit against Black & Decker and its suppliers on the ‘184 patent did
12 those defendants file requests for reexamination of the patent. Even that request was
13 not filed until after almost a year of litigation and a claim construction hearing was
14 imminent.

15 *Ex parte* reexamination requests to the USPTO are a procedure whereby
16 anyone, even anonymously, can assert that there are problems with a patent. Ninety-
17 six percent of all such requests result in a reexamination being conducted. However,
18 only around 10% of such requests result in cancellation of all claims in a patent.
19 *Kramer Decl.* #2 ¶ 4. The results of an *ex parte* reexamination request are not
20 binding on the requestor.

21 Unfortunately, the request review process uses the loaded term “substantial
22 question of patentability” as the measure of whether a request will be accepted for
23 review. While the ordinary meaning of the words suggests a high likelihood that
24 there is some problem with the validity of the patent, the term of art does not have
25 that meaning. Instead, the USPTO’s Manual for Patent Examination Procedure
26 (“MPEP”) specifically states that “no *prima facie* case of unpatentability need be
27 found to grant an order for reexamination. . . .” *MPEP* § 2240 (emphasis added).
28

1 “Substantial question of patentability” for purposes of acceptance of a
2 reexamination request means that a patent examiner would find the cited reference
3 “important” to review; it does not mean a *prima facie* case of invalidity, nor a
4 substantial probability that the patent will be invalidated.

5
6 For "a substantial new question of patentability" to be present, it is only
7 necessary that: (A) the prior art patents and/or printed publications raise
8 a substantial question of patentability regarding at least one claim, i.e.,
9 the teaching of the (prior art) patents and printed publications is such
10 that a reasonable examiner would consider the teaching to be important
11 in deciding whether or not the claim is patentable; and (B) the same
12 question of patentability as to the claim has not been decided by the
13 Office [previously]. . . . It is not necessary that a "*prima facie*" case of
unpatentability exist as to the claim in order for "a substantial new
question of patentability" to be present as to the claim. Thus, "a
substantial new question of patentability" as to a patent claim could be
present even if the examiner would not necessarily reject the claim

14 *MPEP* § 2242.

15 The fact that the USPTO finds a “substantial question of patentability” in 96%
16 of reexamination requests filed with its office, though only 10% eventually result in
17 complete cancellation of the patent well illustrates how minimal the USPTO’s initial
18 review must be before accepting a reexamination request.

19 Describing a patent as being “suspect” simply because the USPTO has
20 accepted an *ex parte* reexamination request for processing is grossly misleading.
21 The reality is that every *ex parte* reexamination request that includes the properly
22 filled in and artfully worded forms and at least one piece of prior art that is arguably
23 related to the broad category of technology of the patent is accepted.

24 The ‘184 patent is not “suspect,” and decisions regarding preservation of
25 evidence relating to infringement are no less worthy of consideration because an
26 accused infringer’s reexamination request was one of the 96% of such requests that
27 proceed to reexamination with the misleading description of having a “substantial
28 question of patentability.”

1 **II. PLAINTIFF’S REQUESTS FOR INFORMATION ARE NARROW,**
2 **CONCISE, AND UNAMBIGUOUS.**

3 Plaintiff has requested only one, narrow category of information from
4 Defendant - sworn identification of the manufacturer(s), supplier(s), and/or
5 importer(s) of the accused products. The other request is that Defendant not interfere
6 in the conduct of third-party discovery.

7 Defendant’s contention that Plaintiff is strategizing to “run up the costs” is not
8 only untrue, but nonsensical. Defendant had several opportunities to provide the
9 requested information informally before this motion was filed, or by stipulation after
10 the motion was filed, but refused.¹ *Kramer Decl.* #2 ¶ 5.

11 There is no expenditure of large amounts of court and party resources in
12 supplying a simple, sworn, list of names and addresses of all manufacturers,
13 suppliers, and importers of the Accused Products.

14 Ryobi’s claims that Plaintiff has not been explicit enough in describing
15 evidence sought to be preserved is disingenuous. Simple English descriptions were
16 used, and Ryobi’s counsel claimed inability to understand them does not render plain
17 English ambiguous.

18 Plaintiff asked for “prototype and production molds used in the production of
19 the Accused Products” and “design and technical documents” for the accused
20 products. Ryobi has known from the original notification in this matter what portion
21 of the Ryobi products are accused of infringement – the external plastic shell. This
22 notification was first made by letter dated September 16, 2004, from SRDT counsel,
23 Mr. Kaler, along with a drawing, claim chart, and copy of the ‘184 patent. In the
24 Complaint, Plaintiff also identified the accused component as the dual-layer external
25 plastic shell of several specific Ryobi products. Docket #1, ¶¶ 16 and 17.

26 Anyone who has made jello knows what a mold is. A mold used in the

27
28 ¹ Several other defendants similarly situated did cooperate in this manner and
no Motion for Exception to Stay was filed with the Court in those cases.

1 production of accused products is, in simple layman's terms, the structure into which
2 plastic is injected to form a plastic product. The designation of "prototype" and
3 "production," again in layman's terms, refers to either the test version or the version
4 used for production of the product. Asking for clarification of plain English should
5 be treated as what it is – disingenuous failure to cooperate and attempts to gain
6 delay.

7 Likewise, design and technical documents relating to those products -- the
8 accused portion of which is known to be the external plastic shell -- hardly qualifies
9 as an ambiguous request. The entire point of this request is not to engage in
10 extensive, detailed discovery now, but rather to require the party with superior access
11 to essential manufacturing process information to allow Plaintiff to ensure
12 preservation of that evidence.

13 **III. RYOBI HAS DENIED PLAINTIFF MANUFACTURING EVIDENCE** 14 **AND THE OPPORTUNITY TO SEEK IT FROM SUPPLIERS.**

15 For three years, Plaintiff sought through repeated requests pursuant to 35
16 U.S.C. § 295, to obtain reliable information about the Accused Processes from
17 Ryobi. None has ever been received. *Kramer Decl.* #2 ¶ 6.

18 The Chen document referenced in Ryobi's pleadings is inapplicable to this
19 patent infringement case because it references different companies and different
20 products. *Kramer Decl.* #2 ¶ 7.

21 If Defendant intended to include a clone Chen document to those in the related
22 Emerson and Senco cases but listing Ryobi products, it would come no where close
23 to admissible evidence in a U.S. court of law for the same reasons set forth in those
24 Reply papers. It does not allow for Plaintiff to conduct any follow-up to test the
25 veracity of its statements. *Kramer Decl.* #2 ¶ 8.

26 Cases cited by Ryobi trying to buttress the Chen document do not support
27 their position for reasons beyond facial irrelevance. In *American Home Assurance*
28

1 *Co. v. Zim Jamaica*, 296 F.Supp.2d 494, the court was faced with the question of
 2 sufficiency of evidence to support plaintiff's motion for summary judgment, not
 3 admissibility of a contested declaration. The Court did make it clear that a
 4 declaration was far inferior to deposition and cross-examined testimony, though.

5 FN8. Nasm and Xiji have submitted declarations in support of plaintiff's
 6 motion, but have not been deposed or otherwise subject to cross-
 7 examination. The Court makes no finding here as to either Nasm or
 8 Xiji's credibility, but notes that **deposition testimony generally is more
 reliable than an affidavit.**

9 *American Home*, at 503.

10 In *Commodity Futures Trading Comm'n v. Topworth Int'l Ltd.*, 205 F.3d 1107
 11 (9th Cir. 2000), the court found the district court's failure to consider a Chinese
 12 declaration as part of the record to be error, but concluded that it was harmless error.
 13 *Commodity Futures* at 1113. Unlike the *Commodity Futures* case, Ryobi is
 14 suggesting that this Court and Plaintiff must wholly rely upon a Chinese national's
 15 declaration as the only evidence of the actual manufacturing process at issue in this
 16 case.

17 Ryobi has not provided actual manufacturing process information and has not
 18 provided information sufficient for Plaintiff to take any steps it can to obtain that
 19 information. That is all Plaintiff is seeking at this point.

21 **IV. ABSENT IDENTIFICATION OF THIRD PARTIES WHO POSSESS**
 22 **MANUFACTURING PROCESS INFORMATION, PLAINTIFF HAS**
 23 **NO ASSURANCE OF PRESERVATION OF NECESSARY EVIDENCE.**

24 In *Sorensen v. Black & Decker*, Case No. 06CV1572, this Court allowed
 25 limited discovery to permit plant inspections of a third-party Missouri manufacturer
 26 because

27 [The Court]: . . . [The manufacturers] are not a party. They are really
 28 under no obligation to keep the molds and store the molds at their
 expense, and I think the examination of the molds is appropriate . . . , the

1 only way to do it is to allow you to apply for a Rule 45 and Rule 34
2 subpoena.

3 June 3, 2008 hearing in *Sorensen v. Black & Decker*, Case No. 06CV1572 (page 23
4 attached).

5 It is unknown whether these unidentified non-parties are still manufacturing
6 the Accused Products, or when such manufacture will cease. The Products may go
7 out of production before the stay is lifted, which would be detrimental to Plaintiff
8 because the molds could no longer exist.

9 The inherent problem in not granting the relief requested is that during the
10 pendency of a stay of undetermined duration, the parties with actual access to
11 manufacturing process information are both outside of the jurisdiction of this Court
12 and have no incentive to preserve evidence. The party with superior access via its
13 supplier relationships – Ryobi – also has no incentive to preserve evidence.

14
15 **V. THE 35 U.S.C. § 295 PRESUMPTION WOULD PROVIDE PARTIES**
16 **WITH EVIDENCE THE INCENTIVE TO PRESERVE IT.**

17 The 35 U.S.C. § 295 presumption of infringement is intended to address the
18 difficulty of proof that the patented process was used when the party with the best
19 control of the evidence has no incentive to provide it to the other party. 35 U.S.C. §
20 295 was passed to help U.S. patent holders deal with the increasing number of
21 foreign manufacturers importing infringing products into the United States, and the
22 difficulty in obtaining discovery of manufacturing processes from such foreign
23 manufacturers:

24 This presumption addresses a great difficulty a patentee may have in
25 proving that the patented process was actually used in the manufacture
26 of the product in question in those cases, where the manufacturer is not
27 subject to discovery under the Federal Rules of Civil Procedure. For
28 example, patent owners will frequently be unable to obtain information
 concerning the nature of processes being practiced by foreign
 manufacturers. Shifting the presumption should create no substantial

1 burden, as an accused infringer should be in a much better position to
2 establish that the product was made by another method.

3 *House Committee on the Judiciary, Process Patents Amendments Act of 1987,*
4 H.R. REP. NO. 100-60, at 16 (1987).

5 The intent of Section 295 is to place the burden of proving/disproving
6 infringement on the party in the best position to offer the proof. In most cases, the
7 importer who, by reason of their relationship with the manufacturer, is in the best
8 position to get process information:

9
10 Importers, for example, because of their relationships with foreign
11 manufacturers, may be able to exert pressure on such manufacturers to
12 produce the necessary information. Users and sellers who purchase
13 possibly infringing articles from importers may be able to exert similar
 pressure on those importers, who would in turn influence foreign
 manufacturers.

14 *Senate Committee on the Judiciary, Process Patents Amendment Act of 1987,*
15 S. REP. NO. 100-83, at 57 (1987).

16 With this in mind, the legislature intended the threshold for the burden shifting
17 to be far less than that of requiring the patent holder to submit letters rogatory:

18
19 A reasonable effort requirement could easily be satisfied in the United
20 States through our discovery procedures. For a foreign manufacturer
21 the patentee would have to take some reasonable step, such as writing to
22 the manufacturer, to determine how the product was made and to have
23 been unsuccessful in this regard. The reasonableness of the effort
 would depend on the facts of the case but should generally avoid the
 need for such measures as letters rogatory or suits in a foreign country.

24 *Senate Committee on the Judiciary, Process Patents Amendment Act of 1987,*
25 S. REP. NO. 100-83, at 45 (1987) emphasis added.

26 The legislative history is abundant that the purpose of section 295 is to lift
27 from the shoulders of patent holders the undue burden of pursuing discovery options
28 outside the Federal Rules against manufactures in foreign countries.

1 In this case, Defendant is relying upon a stay to further complicate Plaintiff's
2 ability to collect and preserve evidence of the accused process. Without
3 identification of the manufacturers of the accused products, Plaintiff cannot even
4 write a letter to the manufacturer and seek cooperation.

5 Because of the stay, no request for invoking the 35 U.S.C. § 295 presumption
6 of infringement has yet been filed. However, the purpose of section 295 is directly
7 relevant to this preservation of evidence motion.

8 To avoid undue prejudice to the Plaintiff, this Court should either allow the
9 narrow, limited discovery that is being sought, or entertain a 35 U.S.C. § 295 motion
10 that would assign the burden of proof of infringement to the parties that are in the
11 best position to obtain and preserve manufacturing process information.

12 13 CONCLUSION

14 Defendant has presented no credible excuse or reason why Plaintiff should not
15 be given a sworn list of the third parties that have possession of evidence essential to
16 this case. Disparaging the subject patent as "suspect," is the most egregious, yet
17 singularly unmeritorious, argument.

18 Plaintiff has requested a narrow category of identification(s) and leave of the
19 Court to pursue any available procedural remedies to ensure preservation of evidence
20 that is outside of the control of the parties to this case and outside of the jurisdiction
21 of this Court.

22 If the Court is unwilling to grant this narrow discovery, leaving essential
23 evidence hiding behind the skirts of the Defendant during the pendency of stay, then
24 the Court should ensure a level playing field by allowing Plaintiff to file a motion for
25 invocation of the 35 U.S.C. § 295 presumption of infringement to switch the burden
26 of proof of the manufacturing process to the Defendants. This would allow the Court
27 to align the obligation and incentive to ensure manufacturing process information
28 with the party that has superior (and only) access to it.

17 Motion Hearing

18 BEFORE THE HONORABLE BARRY TED MOSKOWITZ
19 UNITED STATES DISTRICT JUDGE

20 APPEARANCES:

21 *For the Plaintiff:*

22 Kaler Law Offices
23 J. Michael Kaler
24 9930 Mesa Rim Road St. 200
25 San Diego, CA 92121

Kramer Law Office
Melody A. Kramer
9930 Mesa Rim Road, St.1600
San Diego, CA 92121

For the Defendants:

Niro, Scavone, Haller & Niro
Raymond P. Niro, Jr.
181 West Madison Street,
Suite 4600
Chicago, IL 60602

1 THE COURT: Unless, if you represent them, there is
2 a consent, you know, a consent to jurisdiction of this court
3 to enter the order allowing for it.

4 MR. NIRO: I don't think they have consented to
5 jurisdiction here. Just in response to the letter from 10:10:15
6 plaintiff to Revere Plastics, they retained our services. I
7 know Ms. Goddard --

8 THE COURT: Normally when you want to get discovery
9 from a nonparty that is out of district you have to go to the
10 court in that district. 10:10:30

11 MR. NIRO: I think that would still apply here.

12 THE COURT: Except if they consent to jurisdiction
13 in the court where the underlying case is pending.

14 MR. NIRO: I haven't talked to Revere Plastics
15 about that, but I would be surprised if they consented to 10:10:46
16 that. But, again, if an issue comes up, where if they are
17 scheduling to destroy this plant or destroy some molds, we
18 will certainly notify the court and notify plaintiff and at
19 that time they can inspect.

20 THE COURT: What obligation -- if I have no 10:10:59
21 jurisdiction over them, what can I do to them?

22 MR. NIRO: I don't think anything, Judge.

23 THE COURT: Right. So that's kind of a hollow
24 offer.

25 MR. NIRO: If there is no jurisdiction then there 10:11:16

1 is no -- then there is nothing that we are talking about
2 today.

3 THE COURT: If they go to Missouri and they get an
4 order there, then there would be jurisdiction in Missouri, so
5 if they violated that order they would be held in contempt. 10:11:25

6 MR. NIRO: Right. If that's what your Honor is
7 suggesting, that they issue a subpoena from the Missouri
8 court, we can address it there.

9 THE COURT: They have to unless Revere consents to
10 jurisdiction in this court. 10:11:37

11 MR. NIRO: Right.

12 THE COURT: I'm going to grant that. The reason I
13 am going to grant it is they are not a party. They are
14 really under no obligation to keep the molds and store the
15 molds at their expense, and I think examination of the molds 10:11:48
16 is appropriate.

17 If they were a party then I would feel differently
18 at this point. But since they're not, you really need to
19 preserve evidence. And since I don't have jurisdiction over
20 them, the only way to do it is to allow you to apply for a 10:12:03
21 Rule 45 and Rule 34 subpoena.

22 MR. NIRO: Your Honor, just to clarify, what the
23 court is granting is that plaintiff can issue a Rule 45
24 subpoena; is that correct?

25 THE COURT: Right. 10:12:21
